

A Mark of Assurance
in Seed Treatments

You choose a seed treatment package to help ensure a successful season. In turn, you should feel assured that those seed treatments perform as expected and work well with the genetics you're planting. LumiGEN® seed treatments are exclusive to the seed brands of Corteva Agriscience™, and represent the high performing, industry leading seed applied technologies that are available on Pioneer® seeds genetics.

Exclusive to Corteva Agriscience

LumiGEN seed treatments are designed, verified and proven to work with Pioneer seeds genetics, helping farmers establish healthy, uniform crops and maximize productivity.

Designed for our genetics

Verified on our genetics

Proven in the field with our genetics

A Mark of Assurance in Seed Treatments

LumiGEN seed treatments are extensively tested across multiple years, geographies, and environments. LumiGEN seed treatments are selected and verified through our rigorous PASSER testing process that evaluates in 6 key areas: Plantability, Application, Seed Safety, Stewardship, Efficacy, and Regulatory. As a result, LumiGEN has become a trusted mark of assurance in seed treatments.

Look for the LumiGEN logo on your seed tag, and feel assured that you are using proven, industry-leading seed treatments that have been designed for your seed genetics.

LumiGEN® Corn Seed Treatments

NEW

Lumiscend™ Pro

FUNGICIDE SEED TREATMENT

New Lumiscend™ Pro delivers multi-mode of action protection of early season diseases, adding a new level of protection against rhizoctonia and pythium species.

NEW

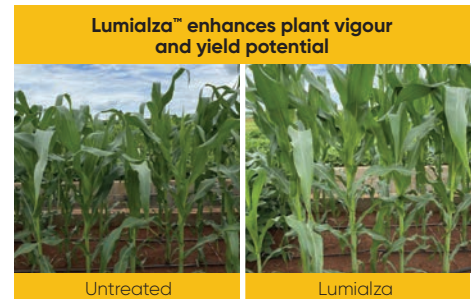

Lumialza™

NEMATOCIDE SEED TREATMENT

Lumialza™ nematocide seed treatment is a biological nematocide that shields corn roots from harmful nematodes for over 80 days while cooperating with beneficial organisms to enhance crop vigour and yield potential.

Key benefits

- New Lumialza™ nematocide seed treatment is a biological nematocide that provides protection from key yield-robbing nematodes while cooperating with beneficial organisms for improved soil health
- Lumialza provides over 80 days of protection creating a large zone of protection, encompassing the entire area of root growth including lower, mid and upper root zones
- Enhances plant vigour and yield potential by creating an optimal environment for root growth, crop development & uniformity

Lumivia™

INSECTICIDE SEED TREATMENT

Lumivia™ insecticide seed treatment delivers excellent broad-spectrum protection on key early season corn insect pests.

Key benefits

- Outstanding protection against key early season corn insect pests
- Provides seedling protection to develop uniform and healthy stands that maximize yield potential
- Simplifies your seed treatment decision
- Offers a favourable environmental profile

Lumivia Yield Advantage

+3.2 BU/AC

In demo trials compared to FST only treatment.

Uniform, healthy stands & improved yield potential over fungicide only treated seed

LumiGEN® Soybean Seed Treatments

Lumisena™

FUNGICIDE SEED TREATMENT

Lumisena™ fungicide seed treatment provides the best protection against phytophthora for healthier, more vigorous soybean stands and higher yield potential.

Protection against phytophthora

- Lumisena is the most advanced seed applied technology to protect against phytophthora
- It is the only seed applied technology that delivers residual protection across multiple stages of the phytophthora pathogen's life cycle: preventative, eradicated, curative and antisporeulant
- Lumisena is a group 49, a new class of chemistry for superior disease protection

More vigorous growth and enhanced emergence

- Lumisena enhances emergence, vigour and root growth, improving soybean stands and maximizing yield potential.

Lumisena Yield Advantage

+3.0 BU/AC

In demo trials compared to competitor FST treatment

Lumiderm™

INSECTICIDE SEED TREATMENT

Lumiderm™ insecticide seed treatment provides broad spectrum protection from early season insect pests including bean leaf beetle, soybean aphid and now registered for cutworms.

Excellent Seedling Protection

- Lumiderm provides soybean seedlings with extended protection against soybean aphid, bean leaf beetle, seedcorn maggot, European chafer, Japanese beetles, white grub, wireworm, and cutworm
- This protection delivers a uniform, healthy stand that maximizes yield potential

Lumiderm + Lumisena Yield Advantage

+1.5 BU/AC

In demo trials compared to standard IST + FST treatment.

Lumiderm complements Lumisena fungicide seed treatment and completes the LumiGEN soybean package. Add Lumiderm to maximize your soybean protection.

Lumiderm Target Pest:
Bean Leaf Beetle
Ontario Soybean Plot Site

FST = Fungicide Seed Treatment
IST = Insecticide Seed Treatment

FST only

Standard IST + FST

Lumiderm + Lumisena + FST
